PROFESSIONAL OVERVIEW

Motivated and detail-oriented IT graduate with a strong foundation in programming, database management, and systems analysis. Proficient in Java, Python, SQL, and C# with hands-on experience leading team-based projects. Adept at solving technical challenges, leveraging innovative tools like Power BI, and staying updated on emerging technologies. Skilled communicator and team player eager to contribute to IT-driven solutions in a dynamic work environment.

LEADERSHIP & PROJECTS

Leadership:

- Successfully led a team during System Analysis and Advanced Database Projects, ensuring timely completion and adherence to project specifications.
- Delegated tasks, monitored progress, and coordinated with team members to ensure smooth collaboration.
- Mentored team members on technical challenges, fostering a supportive and productive environment.

Entrepreneurship:

- Provided IT support services, including software troubleshooting and repair, for local clients.
- Delivered customized technical solutions, improving customer satisfaction and system efficiency.

Academic Projects:

- Database Design and Implementation: Designed a fully functional database system for a mock business, optimizing data storage and retrieval using SQL.
- AI-Based Solutions: Developed an AI-driven decision-support system for solving real-world problems as part of coursework.
- IT Development Projects: Collaborated on a team project to build an inventory management system using C# and SQL.

Problem-Solving Initiatives:

- Diagnosed and resolved network and system performance issues during academic group work.
- Applied creative thinking to overcome challenges in system testing and integration phases.
